Fulda University
- 8 academic departments and over 60 study programmes
- 170 professors and 520 academic and support staff
- 9,700 students
- 1,400 international students

The city of Fulda
- Historic city founded in 744 with picturesque old town
- Only 50 minutes by train from Frankfurt
- A high quality of life, good, low-price accommodation and an ideal study environment

Costs
- Tuition fee: The University is funded by the state, students pay no tuition fees.
- Enrolment fee: approx. €300 per semester including the semester ticket for public transportation in and around Fulda
- Cost of living: €700–€800 per month, including rent, health insurance (€90 per month), depending on living standard
- Job opportunities: There are good job opportunities in the nearby Rhine-Main area, which is one of the strongest employment regions in Germany. Teaching assistantships can be offered to good students.

Five reasons to study at Fulda University
1. Strong research focus: Fulda University is the first university of applied sciences in Germany authorised to award doctoral degrees.
2. Strong international focus: three international Bachelor’s programmes, 5 international Master’s programmes and a variety of short-term programmes
3. Application orientation: strong links to business and industry and excellent job opportunities for graduates on the German and global labour markets
4. Campus university: everything is within easy reach, students soon find their bearings and it’s easy to make friends and contact staff
5. Central location: Founded over 1,250 years ago, Fulda attracts visitors from all over the world with its historical baroque district, half-timbered houses and picturesque cobbled streets. Conveniently located in the heart of Germany, it is just 50 minutes from Frankfurt’s international airport and three hours from Munich and Berlin. With a population of 68,000, Fulda is a peaceful and safe town and a great starting point for exploring the rest of Germany. Accommodation is also still affordable in Fulda!
6. Last but not least: Fulda’s campus is one of the most attractive in Germany. Based on student votes, it ranks among the top five!
The study programme provides an interdisciplinary introduction to three fields of engineering: Applied Computer Science, Electrical Engineering and Food Technology. Students are familiarized with different subject disciplines and acquire foundational skills. Afterwards, students specialize in one of the above areas. Linguistic, intercultural, social and cultural skills are taught in addition to subject-related course work.

The study programme is international in design: courses of the first two semesters are conducted in English. German skills at the level of the DSH2 examination are acquired during the first four semesters. Students with German skills at the DSH2 level acquire similar skills in a foreign language.

Could this be something for you?

- You have a direct university entrance qualification (Hochschulzugangsberechtigung, HZB) for German universities
- You have English language skills (level B2 or equivalent)
- You have German language skills (level B1 or equivalent)

Special offers for international students

- Projects
  - Preparatory courses for international applicants
  - Careers service for international students and graduates
- Services
  - Orientation week prior to the start of the programme
  - Introductory week for “Science & Engineering” students
  - Mentoring system: Support for new students
  - Accommodation service for all students from abroad; costs of accommodation vary between €300 - €400 per month

Programme structure

In the first two semesters of the interdisciplinary study programme, the general basics of engineering (e.g. mathematics, physics, computer science and chemistry) will be taught in English. At the same time, learning German to the DSH2 (C1 level) is another key objective. Lectures are taught in German from the third semester on. The initial orientation module „Introduction to Science and Engineering“ makes it easier for you to choose a specialization at the start of the third semester. This module provides an introduction to the key contents of the three majors. A module in which international students acquire skills in the field of German law and society facilitates your integration in Germany. Depending on your chosen specialization, you will acquire a Bachelor of Science (B.Sc.) or a Bachelor of Engineering (B.Eng.) degree. The practical orientation of the study programme prepares you for work in a German as well as an international environment.
