

Testimonial on International Course in Business

Boitumelo Pitso, University of Free State (South Africa).

Qualification: Bachelor of Commerce with specialization in Entrepreneurial Management

One of my business lecturers told us about the International Course in Business in class and encouraged us to show interest in the course. When the opportunity to study abroad presented itself I just grabbed it, and after some research I was convinced that FUAS is a great institution. I spent time watching videos about the school and the city. Read comments to see what students had to say about the environment and just prepared myself for the unexpected.

I think Fulda is a beautiful and tranquil city, I love the scenery and convenience that comes with it. There is a lot to discover in the city, perfect for a student. I was part of a buddy programme, I was allocated a tutor who later became a dear friend. There were also other tutors who were extremely helpful from my arrival until my departure, they really made it easy for me to settle in.

Studying in Germany was my first different study culture and the experience was absolutely incredible. Before the course, I had no knowledge of the German language. I had an awesome lecturer during the course who taught me a lot of German, to this day I can still speak basic German.

The International Office helped me find a great apartment. I had my own space, but there were other students who also lived in the building.

At first, I struggled to understand social norms and the people in general but I quickly adapted to the changes. I tried to engage with my lecturers and fellow classmates to the best of my abilities, and I believe I have made great contacts with them. The experience was amazing and extraordinary, I learnt so much in such a short space of time.

My highlight was being able to travel with ease and the food left me stunned, it was different and very unique. The best experience was the trip to Berlin, the city has so much history and many iconic features that I could not wait to see.

Adapting to the culture and understanding the German language were a bit hard at first, but I just had to give it time and ask for help. I got used to everything sooner than I thought, the extra support from the university helped me through this.

I would definitely recommend the program to every single student.

I would advice to become part of the community of international students, it really helps knowing helps with the transition. Enjoy the city, try out different things and engage with fellow classmates, even outside of the classroom.
